

WINDOW TECHNOLOGY – WINDOW HARDWARE

UNI-JET CC180° concealed hinge-side

For timber, PVC and aluminium windows

The innovative solution for particularly large opening widths

The concealed hinge-side of the UNI-JET CC180° allows **windows to open up to 180°** without the sash projecting into the room or blocking corridors. This makes the most of the space and ensures optimal air circulation.

Your benefits at a glance

- **Optimised use of space:** thanks to its 180° opening width, the sash does not extend into the room
- **Maximum load-bearing capacity:** 80 kg without and 100 kg with load-absorption in window and balcony-door format
- **Can be used universally:** for timber, PVC and aluminium windows
- **Compatible:** with the tried and tested UNI-JET central locking system
