## UNI-JET SCF concealed hinge-side

For timber and PVC elements – 30 mm rebate depth

### For the highest design expectations and clear architectural lines

The **UNI-JET SCF concealed hinge-side** gives windows an elegant look and combines advanced functionality with increased security. The concealed construction emphasises the modern appearance of large window elements in particular and ensures a harmonious façade design.

concealed  
hinge-side  
for **30 mm**  
**REBATE**  
**DEPTH**

### Your benefits at a glance

- **Aesthetic appearance:** elegant design without visible hinge-side parts
- **Achieving wider sashes:** without the use of a turn-restrictor
- **Maximum load-bearing capacity:** 150 kg without load-absorption and 180 kg with load-absorption in window and balcony-door format
- **Compatibility with previous hinge-side:** ensures easy conversion and proven functionality
- **Lower maintenance requirements:** thanks to fewer components and a robust design
- **Tested resistance classes:** up to RC3
- **Installation friendliness:** sash hinging with pivot-rest closed
