

WINDOW HARDWARE

ANTI-FALL GUARD

AVAILABLE EXCLUSIVELY FROM GRETSCH-UNITAS

Anti-fall guard

FOR TURN-ONLY, TILT&TURN AND TILT-FIRST WINDOWS

Why is an anti-fall guard required?

In public facilities and in the private sector it is more or less impossible to monitor all influencing factors on windows in every respect. A window will often fall out because it is not being misused or due unforeseen events that are beyond human control: children may play with or climb on the window or a sudden gust of wind may slam it shut – these situations only arise in practice and are difficult to prevent.

The solution from Gretsch-Unitas

Discover the innovative anti-fall guard by Gretsch-Unitas – your solution for maximum safety! Our product provides reliable protection against the sash falling out, which effectively prevents possible damage to property and physical injury. Why not put your trust in Gretsch-Unitas and enhance the safety of your home or facility for additional peace of mind in future!

GRETSCH-UNITAS – YOUR PARTNER IN THE AREA OF WINDOW HARDWARE
WE WILL ALWAYS FIND A SOLUTION TOGETHER

Securing technology for you

The anti-fall guard in detail

- + **Maximum safety in every situation:** provides reliable protection against misuse and unforeseen events beyond human control – if the sash does not fall out, no harm can come to persons or material objects
- + **High durability** due to gentle opening of the sash: the spring in the sash part ensures that the sudden tilting motion is gently intercepted
- + **Versatile application range:** perfect for timber, PVC and aluminium windows
- + **High performance** for large sashes: suitable for sashes weighing up to 200 kg
- + **Easy to retrofit:** can be integrated quickly and easily in existing systems
