livius reversible key system

Securing technology for you

**livius**<sup>®</sup>

## An innovative and compelling locking system

The livius brand is a convincing modern locking system with reversible key technology. Thanks to the patent protection, livius locking cylinders provide security that you can also rely on in the years ahead. As the key can be inserted from both sides, operation is exceptionally easy and the keys with innovative channel for slider in the livius SL system ensure effective copy protection.

livius is the ideal reversible key system to choose if you wish to install modern, mechanical security technology in your home with a registered key bitting, or equip your multiple dwelling building or commercial premises with a master key system.

## High comfort in every situation

### CHARACTERISTICS

- Highly flexible: cylinders with and without a locking bar can be combined so that different security levels can be established within one master key system
- More comfort: the expansive grip area of the reversible key allows straightforward opening and closing via the cylinder – even with tall or heavy doors
- Striking design: the blue ball is a sign of BKS quality and accentuates the symmetry of the reversible key
- Great operation: the extended key shank makes livius well suited for security hardware with a cylinder cover
- Straightforward handling: the symmetrical design and familiar upright key position ensure intuitive operation
- Protection against bumping as standard
- Drilling/picking protection to prevent forced opening
- Emergency function that prevents blocking by inserted keys

# livius locking cylinders: the right choice – not just in terms of security

livius locking cylinders are based on the tried-and-tested single-row pin arrangement and impress with their modern reverse key technology. The locking system has 6 separate pin tumblers as standard. The cylinders are suitable for a wide range of applications and are available in different function variations.

**Easy operation:** the cylinder plug features a reversible key profile and a key channel for better insertion.

**Security package:** picking and drill protection pins together with lateral slide locks form an effective security package. They guarantee security in regard to drilling/picking protection against forced opening and manipulations attempts.

**Special functions:** different shapes of coupling enable important features such as the emergency and freewheel function. The locking cylinder can be operated providing a suitable key is already inserted in the cylinder on the opposite side.

Easy operation

Special functions

Security package

BKS offers documented security – verifiably protected. Registered key bittings by BKS are always supplied with a corresponding security card. The card serves as proof of ownership and contains all the specific data required for reordering of cylinders and keys. BKS security cards can be read out at all authorised specialist dealer.

## livius product range – one key for all eventualities

**1 Double cylinder:** available as standard cylinder with special cylinder cams or with additional features.

**2 Half cylinder:** can be used universally in many additional locks.

**3 Padlock:** also available with extra-thin or high shackles.

**4 Cylinder cam lock:** suitable for various letter boxes with different locking levers.

**5 Switching cylinder:** with microswitches for controlling external electronic control devices.

**6 Rim cylinder:** locks or unlocks rim locks from the outside of the door.

**7 Knob cylinder:** the cylinder thumbturn can be selected, exchanged or replaced.

**8 Key with SE transponder:** maximum operating convenience due to combination of mechanical and electronic systems.

**Consult your specialist dealer. He will be pleased to give you advice.**

## Security has a name, or to be more precise, a brand – BKS

BKS GmbH, a member of the Gretsch-Unitas group, stands for more than 100 years of experience in the development and manufacturing high quality locking systems. Ever since the round cylinder was developed in 1938, BKS GmbH has been, and still remains today, a market leader in the field of locking technology and security.

BKS locking systems offer individual tailor-made solutions. They are manufactured according to exacting quality standards. Opting for a BKS master key system, you choose outstanding quality of function and design. Countless patents and certificates testify to the innovative prowess of all BKS products. They give you flexible design options, also when retrofitting in existing buildings.

” *The range of products for the livius locking system includes a large assortment of cylinders for many applications – also for upgrading or extending your master key system by incorporating electronic components.*
