## GU-thermostep flush with the floor for Lift&Slide elements

Securing technology for you

## Barrier-free thresholds for Lift&Slide elements

In the area of Lift&Slide elements, the barrier-free solution can be used with all GU-thermostep 164 and GU-thermostep 204 thresholds. As far as the fabricator is concerned, everything from production through installation in the building remains the same. The components that provide barrier-free passage are simply added.

### Fabricator benefits:

- Lift&Slide elements can now be offered barrier-free
- The existing threshold designs remain unchanged
- The threshold-to-structure connection remains unchanged
- As far as the fabricator is concerned, everything from production through installation in the building remains the same
- The accessibility is provided by additional components
- Simple and easy installation

### Benefits for end customer:

- Lift&Slide elements can be installed "barrier-free" now
- Low maintenance and care due to removable profiles
- Appealing design
- Drainage type freely selectable
- Can be easily retrofitted to existing elements with GU-thermostep

Lift&Slide element (PVC) with GU-thermostep, barrier-free
