Consult your specialist dealer. He will be pleased to give you advice.

## Security has a name, or to be more precise, a brand – BKS

BKS GmbH, a member of the Gretsch-Unitas group, stands for more than 100 years of experience in the development and manufacturing high quality locking systems. Ever since the round cylinder was developed in 1938, BKS GmbH has been, and still remains today, a market leader in the field of locking technology and security.

BKS locking systems offer individual tailor-made solutions. They are manufactured according to exacting quality standards. Opting for a BKS master key system, you choose outstanding quality of function and design. Countless patents and certificates testify to the innovative prowess of all BKS products. They give you flexible design options, also when retrofitting in existing buildings.

“  
The detect3000 conventional locking system offers you a high degree of flexibility. The product range additionally convinces with a wide selection for any application.”

MORE SECURITY

Proven strength for more security

Conventional cylinder system

| A company of the Gretsch-Unitas group

# detect3000

Patent protection until 2038

## detect3000: the right choice – not just in terms of security

detect3000 locking cylinders are based on the tried-and-tested single row pin arrangement and rely on conventional key insertion.

**Versatility:** the reliable and versatile cylinders cover the full range of applications.

**Security package:** picking and drill protection pins form an effective security package.

## Proven strength for more security

The detect3000 conventional cylinder system builds on the strengths of its predecessor and offers additional improved technology. With detect3000 you can count on a tried-and tested system for your privately owned house or your commercial premises.

Due to the patent protection, the locking system is the ideal solution if you wish to equip your own home, multiple dwelling building or commercial premises with its own master key system. Thanks to the wide product range, detect3000 can cover any application.

### FEATURES

- Patented technology until 2038
- Protection against bumping as standard
- Drilling/picking protection to prevent forced opening
- Emergency function that prevents blocking by inserted keys
- Various equipment and designs
- Great operation: the extended key shank makes detect3000 well suited for security hardware with a cylinder cover
- Simple operation: the familiar upright key position ensures an intuitive operation

BKS offers documented security – verifiably protected. If a new key or cylinder is required, you can use the BKS security card to securely and reliably legitimise yourself both in person at the specialist dealer and very easily from home via the new BKS identification app.
