

Product range – security for every requirement

1 Mechanical cylinder systems: the various locking systems offer a wide range of solutions for securing individual doors and for planning modern master key systems. They stand for comfort and security

2 Electronic cylinder systems: ixalo – the electronic locking system is an impressive all-round system solution. The components are impressive, not least due to the technical functions but also due to the modern product design

3 Hardware: maintenance-free lever handle bearing door hardware is impressive with innovative technology and enduring functionality

4 Locks: comfortable and secure door functions. From a sophisticated panic lock for escape doors to a simple mortise lock – you will find the right lock for practically every application in our range

5 Smart Security: whether you opt for an intrusion detection system, video intercom or video system, your private home will immediately be secure, and you can access the system from anywhere

6 Building management system: the GEMOS advanced physical security information system and organisation system (advanced PSIM) makes it possible to adapt to individual customer user profiles

Security has a name, or to be more precise, a brand – BKS

BKS GmbH, a member of the Gretsche-Unitas group, stands for more than 100 years of experience in the development and manufacturing high quality locking systems. Ever since the round cylinder was developed in 1938, BKS GmbH has been, and still remains today, a market leader in the field of locking technology and security.

BKS locking systems offer individual tailor-made solutions. They are manufactured according to exacting quality standards. Opting for a BKS master key system, you choose outstanding quality of function and design. Countless patents and certificates testify to the innovative prowess of all BKS products. They give you flexible design options, also when retrofitting in existing buildings.

„ We guarantee high product quality with our production site in Germany. We continuously drive innovations forward and aim to provide exemplary customer service.

MORE SECURITY

BKS identifikation app

The new type of authentication

| A company of the Gretsche-Unitas group

Authentication made easy

This is already established practise in the financial sector and now the tide is turning with architectural hardware too. You can now reorder flexibly and conveniently by authenticating yourself from anywhere.

Do you need another key for your cylinder? Until now, your only option was to drive to your specialist dealer and use your security card to identify yourself on site to place an order. You can now authenticate yourself conveniently and securely at home or away from home with our app BKS identifikation.

SPECIAL FEATURES

- Highest security standard (VdS certification)
- Anonymous verification without providing personal data.
- Flexible: independent of opening times and days of the week
- Convenient: simply from home or when away
- Time-saving: no driving times
- Identification via the NFC function of the smartphone without changing media
- Transfer of relevant data from the security card
- Fast electronic provision of the identification data in our MKS ordering software for direct ordering via the specialist dealer
- Hygienically safe
- High security through continuous compliance with data protection guidelines
- Fast procedure (identity proven within only 2 minutes)

Protected against data misuse

Maximum security always comes first with BKS. We offer technically advanced products that protect against intrusions into your privacy, and have been doing so for many years. This will of course be no different when using our BKS identifikation app.

Highest security demands: a patented multi-stage verification process is used between BKS identifikation and the BKS verification points.

Data protection: data misuse is a topical subject, and one which we entertain no discussions about by ruling it out completely. This is because your data is transmitted in encrypted form and then also completely deleted afterwards.

Available free of charge for iPhone and Android devices from the relevant store.

Security card – new technology, new design

The new hybrid security card caters for the cutting edge technological requirements for successful and straightforward authentication. The card has an integrated encryption function which means it is forgery-proof and cannot be copied. It also contains a RFID chip module and can therefore communicate with your NFC-compatible smartphone.
